De la Cruz Law was founded to provide seamless support to families and small business owners.

De la Cruz Law is a different kind of law firm. We specialize in Estate Planning and in Elder and Small Business law. Our founder, Cherish De la Cruz set it up this way because she recognized how often these areas of the law overlap – because small businesses are often family businesses and small business owners often have families.

We believe in long-term relationships. At De la Cruz Law, we get to know our clients, their family members, and their businesses. We have the candidness and compassion needed to discuss difficult and important topics. And our goal is to be an ongoing resource throughout all of the life stages of your family or your business.
